

1. (1 балл) Найдите значение выражения: $(2\frac{2}{7} + \frac{1}{14}) : (2\frac{3}{7} + 1\frac{1}{2})$

$$(16/7+1/14)/(17/7+3/2)=3/5$$

$$16/7+1/14=32/14+1/14=33/14$$

$$17/7+3/2=34/14+21/14=55/14$$

$$33/14*14/55=3/1*1/5=3/5$$
