

1. Вычислите: $5\frac{7}{8} - 3\frac{5}{12} + 1\frac{13}{24}$

$$5\frac{7}{8} - 3\frac{5}{12} + 1\frac{13}{24} = 4\frac{7}{8} - 3\frac{5}{12} + 1\frac{13}{24} = 14\frac{1}{24} - 11\frac{10}{24} + 1\frac{13}{24} = 4\frac{14}{24} - 11\frac{10}{24} + 1\frac{13}{24} = 4\frac{14-10+13}{24} = 4\frac{17}{24} = 4$$
