

```
#include <stdio.h>
char *ft_strdup(char *src);

int main(void) {
    char *greet = "Salut";
    char *test1 = "Gonna pass this test, even if I gotta dup!\n";
    char *test2 = ft_strdup(test1);

    printf("%s\n", ft_strdup(greet));
    printf("test1: %s", test1);
    printf("test2: %s", test2);
    return 0;
}
```
