

Угол между прямой и плоскостью

Общий метод - в координатах

$$\begin{aligned}x+y=P/2 &\Rightarrow y=P/2-x \\z-x=P/2 &\Rightarrow z=P/2+x\end{aligned}$$

$$\begin{aligned}\cos(P/2-x) = \sin x \\ \cos(P/2+x) = -\sin x\end{aligned}$$

$$n, b \quad |n|, |b| \quad (n, b)$$

$$\sin \theta = |\cos(n, b)| = |(n, b)| / |n| * |b| = \cos y$$
