

Найти минимальный среди всех кратных 3 элементов массива

```
def min_el_mass(mass):
    i=0
    flag=0
    while i<=len(mass)-1:
        if flag==0 and mass[i]%3==0:
            min_el=mass[i]
            flag=1
        if flag==1 and min_el>mass[i] and mass[i]%3==0:
            min_el=mass[i]
        i+=1
    if flag==1:
        print(min_el)
    else:
        print("not found")

mass=[-77,2,5,8,5,8,5,2,5,20]
min_el_mass(mass)
print(mass)
```
