

Заполнить массив чётными числами
2,4,6,8,10...

```
n = [1, 45, 234, 2, 7, 212, 99, 2304, 73, 12, 20]
i = 0
a = 2
while i < len(n):
    n[i] = a
    a += 2
    i += 1
print(n)
```

решить без переменной a

```
n = [1, 45, 234, 2, 7, 212, 99, 2304, 73, 12, 20]
i = 0
while i < len(n):
    n[i] = 2 * i + 2
    i += 1
print(n)
```

```
n = [1, 45, 234, 2, 7, 212, 99, 2304, 73, 12, 20]
n[0] = 2
i = 1
while i < len(n):
    n[i] = n[i-1] + 2
    i += 1
print(n)
```
