

# Calculate the sum of all array elements

```
void sumArray(int arr[], int length) {  
    int arraySum = 0;  
    for (int i = 0; i < length; i++) {  
        arraySum = arraySum + arr[i];  
    }  
    std::cout << arraySum << std::endl;  
}
```
