

Посчитать сумму всех элементов массива

```
def vasia(ms):  
    i=0  
    print("[",end="")  
    while i < len(ms):  
        if i==len(ms)-1:  
            print(ms[i],end="")  
        else:  
            print(ms[i],end=" ")  
        i+=1  
    print("]",end="")  
    print()
```

```
def peter(ms):  
    i=0  
    summa=0  
    while i<len(ms):  
        summa=ms[i]+summa  
        i+=1  
    print(summa)
```

```
a=[0,11,22,33,44,55,66,77]  
vasia(a)  
print(a)  
peter(a)
```
