

Filling an array with random numbers of different signs within the range (-50; 50)

```
void sumArray(int arr[], int length) {  
    for (int i = 0; i < length; i++) {  
        arr[i] = rand() % 100 - 50;  
  
    }  
}
```

```
int main() {  
    srand(time(NULL));  
}
```
