

Calculate the sum of even positive and odd negative together

example

25,12,-9,2,-3,1

answer 2

```
void sumArray(int arr[], int length) {
    int countSum = 0;
    for (int i = 0; i < length; i++) {
        if (arr[i] % 2 == 0) {
            if (arr[i] > 0)
                countSum = countSum + arr[i];
        }
        if (arr[i] % 2 != 0) {
            if (arr[i] < 0)
                countSum = countSum + arr[i];
        }
    }
    std::cout << countSum << std::endl;
}
```

```
void sumArray(int arr[], int length) {
    int countSum = 0;
    for (int i = 0; i < length; i++) {
        if (arr[i] % 2 == 0 && arr[i] > 0 || arr[i] % 2 != 0 && arr[i] < 0) {
            countSum = countSum + arr[i];
        }
    }
    std::cout << countSum << std::endl;
}
```
