

```

void puzirok( int mass[], int length)
{
    int i;
    int y;
    int t;
    for(i=0;i<length;i++)
    {
        for(y=1;y<length-i;y++)
        {
            if(mass[y]<mass[y-1])
            {
                t=mass[y];
                mass[y]=mass[y-1];
                mass[y-1]=t;
            }
        }
    }
}

```
