## Problem F. Sequence mean

Find the average of all elements in a 0-terminated sequence. You cannot use arrays in this task.

Input data
A sequence of integers is introduced, ending with the number 0 (the number 0 itself is not included in the sequence, but serves as a sign of its end.

## Output

Print the answer to the problem.

Examples of input data 1 7 9
0
output
5.66666666667

```
```

int N;

```
```

int N;
double averageNum = 0;
double averageNum = 0;
int counterNum = 0;
int counterNum = 0;
// Has not encountered divisor
// Has not encountered divisor
//int status = 0; // Status has not encountered divisor
//int status = 0; // Status has not encountered divisor
// Find average of all elements inputed
// Find average of all elements inputed
//
//
while (1) {
while (1) {
std::cin >> N;
std::cin >> N;
